

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in this Application:

Listing of Claims:

1. (Currently amended) Device ~~for cage~~ for shellfish farming, ~~where the cage is placed in the sea or in a tank with water,~~ comprising a transporter and a cage, wherein said cage has a plurality of sides, a first~~one~~ side of said cage ~~having~~being provided with openings, a second side of said cage having couplings for engaging said cage onto said transporter, wherein said second side is located opposite said first side and the other additional sides of said cage being devoid of openings,~~are closed and wherein the said cage is arranged to be turned turnable to achieve a plurality of positions, so that wherein said one first side equipped with openings faces upwards in a vertical feeding to accommodate the administration of food in a first position, or faces sideways to accommodate shellfish in a horizontal eating and resting in a second position, or and faces downwards in a vertical to accommodate emptying in a third position, as these said positions are being achieved by means of the engagement of said cage being placed on or by onto a said transporter and, optionally, by disengagement of said cage from said transporter.~~

2. (Canceled)

3. (Currently amended) The device according to claim 1, wherein the sides of said cage are provided with buoyancy elements large enough for a detached cage to float in water.

4. (Currently amended) The device according to claim 1, wherein ~~the said~~ cage is provided with devices which render the cage suitable for being grasped and led forward by the transporter in motion.

5. (Currently amended) The device according to claim 4 wherein ~~the said~~ transporter is provided with devices suitable for grasping and locking ~~the said~~ cage ~~which with said one first side of said cage facing upwards being brought in towards an upper part of the said transporter.~~

6. (Currently amended) The device according to claim 1, wherein ~~the said~~ cage is provided with slots for fastening partition walls.

7. (Currently amended) The device according to claim 1 wherein ~~the~~said cage is placed on or by ~~the~~said transporter so that an upper end of ~~the~~said transporter has a vertical position with said ~~one~~first side of said cage facing upwards and a lower end of said transporter has a vertical position with said ~~one~~first side of said cage detached and facing downwards.

8. (Currently Amended) The device according to claim 7, also comprising wherein sections between said upper end and said lower end, said sections being in ~~have~~ a horizontal position.

9. (Currently amended) The device according to claim 7, also comprising wherein sections between said upper end and said lower end, said sections being in ~~have~~ a vertical position ~~where the~~ when said ~~one~~first side of said cage faces upwards.

10. (Currently amended) The device according to claim 7, also comprising wherein sections between said upper end and said lower end, said sections being in ~~have~~ a vertical position ~~where~~ when said ~~one~~first side of said cage faces downwards and is covered.
